NOTE: 32E First Hour Rating = 170 Gallons

*Nipple not included
 **Optional setting, contact factory
 ***Weight does not include burner and controls

(on selected models)

T&P Valve: Factory Installed
 Drain Valve: Factory Installed Brass Valve
 Standard Voltage (all): 120V, 60 Hz, 1P
 Pressures (all): Working Pressure, 150 psi; Testing Pressure, 300 psi
 ASHRAE: All Bock Products Meet or Exceed Current ASHRAE Standards.

Warning: Do not install on combustible flooring. Installation should be in accordance with all national and/or local codes. In the absence of local codes, refer to NFPA 31 or ANSI Z.21.10.1.

Caution: The recommended maximum hot water temperature setting for normal residential use is 120°F. Bock recommends a tempering valve or anti-scald valve be installed and used according to the manufacturer's directions to prevent scalding.
