

The temperature at your fingertips or the temperature of your fingertips!

Inframeter™

Introducing the

INFRA-RED DIGITAL THERMOMETER

The Inframeter.

A very compact and powerful point and shoot infra-red digital thermometer. And it's the radiant contractor's best friend.

The next time you hear "What's that system temperature Tom?", grab the Inframeter.

What can you do with an Inframeter?

-  **Identify heat loss from a room**
(interior vs. exterior walls)
-  **Find air locked circuits**
(point at the floor)
-  **Troubleshoot by comparing pipe temperatures**
(point at manifolds or tubing circuits)
-  **Compare radiant floors and forced air floors**
(sell more retrofit jobs)
-  **See the hidden world of radiant**

Specifications:

Range: -33 to +220°C

Modes: °C or °F (switchable)

Response time: 1 second

Infrared accuracy: $\pm 2\%$ of reading or $\pm 2^\circ\text{C}$

Field of view: 1:1 optics ratio

Battery life: 40 hours continuous use
(auto power off after 15 seconds)

Battery: CR2032

Display: Custom LCD

Dimensions: 18 x 37 68mm

Weight: 32 grams including battery

Cool case, too.

The Inframeter comes in a foam-cushioned hinged metal case with a strap, instructions and an extra battery!
